

The internal structure diagram of the comforter is shown below.

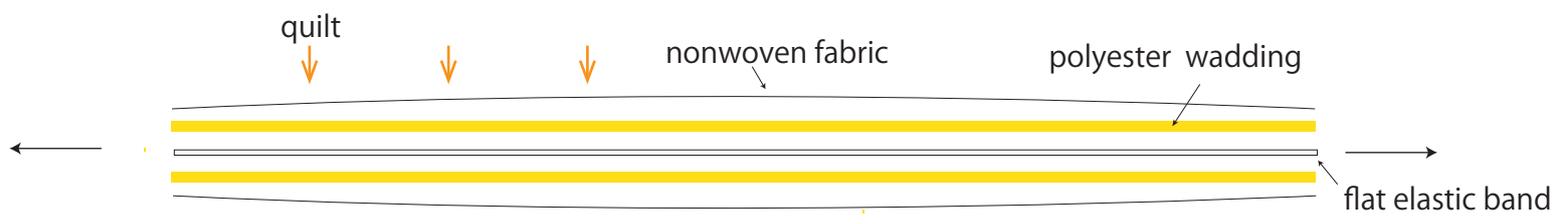

- 5 layer : nonwoven fabric
- 4 layer : polyester wadding
- 3 layer : flat elastic band
- 2 layer : polyester wadding
- 1 layer : nonwoven fabric

It is made of simple materials.

Quilt the fabric with a stretched flat elastic sandwiched between the layers.  
When the elastic is released, the fabric contracts and creates a puffed, voluminous effect.

■ Before quilting (stretched state)

■ After quilting (stretched state)

■ Released state
